GitHub: <https://github.com/mojsun>

PROFESSIONAL SUMMARY

Full-Stack Developer with experience building modern web applications using React, Next.js, Node.js, and MongoDB. Skilled in developing responsive user interfaces, integrating APIs, and working within Node.js-based environments.

Experienced in modernizing web applications, improving performance, and collaborating with cross-functional teams. Hands-on experience with the MERN stack through personal projects, with additional background in testing and automation. Built full-stack MERN applications in personal projects, handling both backend (Node.js, Express) and frontend (React) development.

TECHNICAL SKILLS

Front-End: React.js, Next.js, JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, Tailwind CSS

Back-End: Node.js (Next.js), Express.js (projects), REST APIs, GraphQL, JWT

Databases: MongoDB, MongoDB Atlas, MySQL, SQL

Tools: Git, GitHub, Postman, VS Code, Chrome DevTools

Cloud/Deployment: Heroku, Vercel, AWS (basic: S3, EC2, RDS)

Testing: Selenium, Cypress, API Testing (Postman, Python Requests)

PROFESSIONAL EXPERIENCE

Full-Stack Developer

Elixderm (Remote), Toronto | 2024 – Present

- Migrated website to **Next.js (Node.js-based)** architecture, improving performance and maintainability
 - Integrated **Sanity CMS** for dynamic content management
 - Developed responsive UI components, improving user experience and performance across device
 - Integrated APIs and backend services within a Node.js-based environment
 - Collaborated with designers and stakeholders to deliver new features
 - Performed testing, debugging, and validation
-

Software Tester & Front-End Web Developer

Print Club, Toronto | 2023 – 2024

- Tested web applications and validated user workflows

- Supported front-end updates and API-driven features
- Collaborated with developers to validate frontend-backend data flow
- Identified bugs and improved application usability
- Performed basic automation using **Python and Selenium**

PROJECTS

GetAway Travel App (MERN + GraphQL)

- Built full-stack travel platform using MongoDB, Express, React, Node.js
- Implemented authentication, booking system, and Stripe payments
- Designed APIs and deployed via Heroku + MongoDB Atlas

Choice E-Commerce Platform (MERN)

- Developed full-stack e-commerce app with product filtering and authentication
- Built REST APIs and handled CRUD operations

Elixderm Website (Next.js + Sanity CMS)

- Migrated legacy site to modern architecture
- Built reusable components and dynamic content system

Traveller's Choice (Full-Stack App)

- Built review platform with CRUD functionality
- Managed MongoDB data and deployed on Heroku

ADDITIONAL STRENGTHS

- Agile (Scrum), Jira workflows
- Strong debugging and problem-solving skills
- Fast learner with attention to detail

EDUCATION

Master of Management Analytics (MMA) – Queen's University (2026–2027)

Full-Stack Web Development Certificate – University of Toronto (2023)

Bachelor of Engineering – Mazandaran University (2012–2016)
