GitHub: <https://github.com/mojsun>

---

## PROFESSIONAL SUMMARY

Full-Stack Developer experienced in designing and building scalable web applications using React, Next.js, Node.js, and MongoDB. Delivered full-stack MERN projects involving API development, database design, and responsive UI implementation. Strong in performance optimization, debugging, and integrating frontend and backend systems. Proven ability to collaborate with cross-functional teams and contribute to end-to-end feature development.

---

## TECHNICAL SKILLS

**Front-End:** React.js, Next.js, JavaScript (ES6+), TypeScript (basic), HTML5, CSS3, Tailwind CSS

**Back-End:** Node.js, Express.js (REST API development, backend routing, middleware), REST APIs, GraphQL, JWT

**Databases:** MongoDB, MongoDB Atlas, MySQL, SQL

**Tools:** Git, GitHub, Postman, VS Code, Chrome DevTools

**Cloud/Deployment:** Heroku, Vercel, AWS (basic: S3, EC2, RDS)

**Testing:** Selenium, Cypress, API Testing (Postman, Python Requests)

---

## PROFESSIONAL EXPERIENCE

### Full-Stack Developer

**Elixderm (Remote), Toronto** | 2024 – Present

- Migrated the company website to a Next.js architecture, improving performance, scalability, and user experience
  - Developed and implemented responsive UI components using React and Tailwind CSS, enhancing user experience across multiple devices and ensuring cross-browser compatibility
  - Integrated **Sanity CMS** to enable dynamic content management and streamline content updates
  - Built and integrated **API-driven features** within a Node.js-based environment, improving data flow between frontend and backend
  - Designed and implemented backend logic and API endpoints to support application features
  - Collaborated with designers and stakeholders to deliver features and enhance user journeys
  - Performed **testing, debugging, and performance optimization**, ensuring smooth functionality and reliability
  - Wrote clean, modular, and maintainable code following best practices
- 

**Software Tester & Front-End Web Developer**

## **Print Club, Toronto | 2023 – 2024**

- Executed manual testing of web applications, validating workflows and identifying critical bugs
- Developed front-end features and integrated APIs using JavaScript and Node.js
- Collaborated with developers to ensure accurate data flow between frontend and backend
- Improved application usability by identifying issues and **suggesting UI/UX enhancements**
- Developed basic automation tests using Python and Selenium, introducing automation practices
- Participated in **debugging and validation processes** to improve product quality before release

---

## **PROJECTS**

### **GetAway Travel App (MERN + GraphQL)**

- Designed and developed a full-stack travel platform using the MERN stack, implementing authentication, booking flows, and Stripe payment integration
- Designed REST and GraphQL APIs and deployed via Heroku and MongoDB Atlas

### **Choice E-Commerce Platform (MERN)**

- Designed and developed a full-stack e-commerce platform using the MERN stack
- Designed RESTful APIs, handled CRUD operations, and implemented authentication
- Structured backend using modular routes and controllers
- Designed and structured MongoDB collections and schemas to support application features

### **Elixderm Website (Next.js + Sanity CMS)**

- Migrated legacy site to modern architecture
- Built reusable components and dynamic content system

### **Traveller's Choice (Full-Stack App)**

- Built review platform with CRUD functionality
- Managed MongoDB data and deployed on Heroku

---

## **ADDITIONAL STRENGTHS**

- Agile (Scrum), Jira workflows
- Strong debugging and problem-solving skills with keen attention to detail

---

## **EDUCATION**

**Master of Management Analytics (MMA) – Queen's University (2026–2027)**

**Full-Stack Web Development Certificate – University of Toronto (2023)**

**Bachelor of Engineering – Mazandaran University (2012–2016)**
